

การสืบค้น ค่า Q และค่า Tier 1 ของวารสาร ในฐานข้อมูล Scimago Journal & Country Rank (SJR)

The screenshot shows the Scimago Journal & Country Rank (SJR) website. The browser address bar displays the URL <https://www.scimagojr.com/>. The website header includes the text "also developed by scimago:" and the logo for "SCIMAGO INSTITUTIONS RANKINGS". The main navigation menu contains "Journal Rankings", "Country Rankings", "Viz Tools", "Help", and "About Us". The central heading is "SJR Scimago Journal & Country Rank". A search bar contains the text "Engineering with Computers" and a magnifying glass icon. Three callout boxes provide instructions: "1. เข้าสู่เว็บไซต์ <https://www.scimagojr.com/>", "2. พิมพ์ชื่อหรือเลข ISSN ของวารสารที่ต้องการค้นหา", and "3. คลิกค้นหา". A news banner at the bottom reads "New: SCImago Research Group statement on the war in Ukraine". The Windows taskbar at the bottom shows the search bar, taskbar icons, and system tray with the date 26/8/2565 and time 13:55.

SCOPE

An international journal dedicated to the investigation and innovative use of materials in construction and repair. Construction and Building Materials provides an international forum for the dissemination of innovative and original research and development in the field of construction and building materials and their application in new works and repair practice. The

journal publishes a wide range of innovative research and application papers which describe laboratory and to a limited extent numerical investigations or report on full scale projects. Multi-part papers are discouraged. Construction and Building Materials also publishes detailed case studies and some incisive review articles that contribute new understandings. We are focusing on construction materials papers and we exclude papers on structural engineering, geotechnics and unbound highway layers. The construction materials and technology covered include: cement, concrete reinforcement, bricks and mortars, additives, corrosion technology, ceramics, timber, steel, polymers, glass fibres, recycled materials, bamboo, rammed earth, non-conventional building materials, bituminous materials and railway material applications. The scope of Construction and Building Materials includes, but is not restricted to,

SCOPE

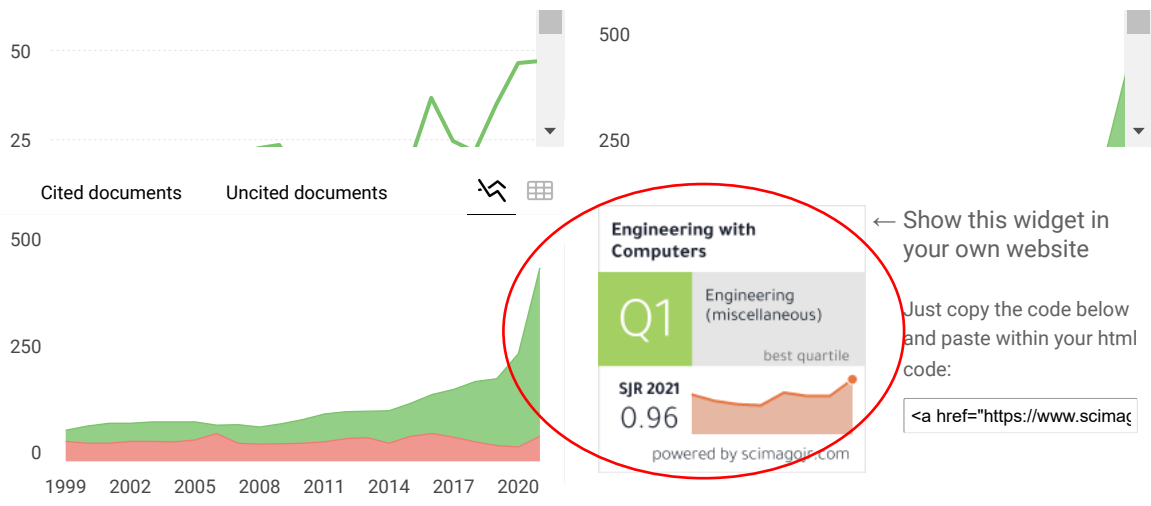

Engineering with Computers is an international journal for simulation-based engineering. It publishes original papers and authoritative state-of-the-art reviews on the technologies supporting simulation-based engineering, and examples of operational simulation-based engineering systems. A partial list of the technical areas covered includes: adaptive simulation techniques, engineering databases, integration with CAD geometry, mesh generation, parallel simulation methods, simulation frameworks, user interface technologies and visualization techniques. Application areas covered include any to which engineering technologies are applied and will range from applications in the automotive industry, to the design of medical devices.

SCOPE

Engineering Journal (EJ) is a peer-reviewed, open-access, and bi-monthly online-published international journal for the complete coverage of all topics in engineering related areas. EJ consists of two major sections in the engineering field: - Environment, Energy and Natural Resources (EJEEN) - A rapidly growing sector in engineering research including virtually all aspects of the environment, energy and natural resources fields: from agricultural systems and engineering, aquaculture and aquatic resource management, food engineering and bioprocess technology, pulp and paper technology, regional and rural development planning and urban environmental management, renewable energy such as solar power, to oil exploration technologies, superconductivity, and nuclear generation. -Modern Engineering Technology (EJMET) - This section contains topics in the combined domain of engineering, technology and applied science, and focuses on solving technical problems. This section disseminates results from the applications of engineering and modern technology such as information technology, biotechnology, nanotechnology and several technologies fueling the imaginations and research budgets of scientists and engineers. Great research emphasis is placed on chemicals, material, agriculture, healthcare, disaster mitigation, transportation, telecommunications, survey, space, chips, computer hardware, computer software, entertainment and telephony. We accept original, unpublished research papers and review articles which are not being considered elsewhere. Provided that the submitted manuscript meets all our minimum requirements, the turnaround time for the first round of double-blind peer review is approximately 2 - 3 months.

V **vedika** 2 months ago

Dear sir, I had prepared my manuscript as per the Engineering Journal template. Now I have some issues regarding the submission of my manuscript. I have checked the website and I found only the login option. Sir kindly guide me from where I will register myself and the procedure for submitting my manuscript to Engineering Journal.

reply

SCImago Team

Melanie Ortiz 2 months ago

Dear Vedika, thank you very much for your comment. Unfortunately, we cannot help you with your request, we suggest you contact the journal's editorial staff so they could inform you more deeply. Best Regards, SCImago Team

N **Nasir** 7 months ago

Dear Sir

When I prepared my paper in Submission Preparation Checklist stage. I saw this message :- "This journal is not accepting submissions at this time".

Thanks

Lecture Notes in Mechanical Engineering (LNME) publishes the latest developments in Mechanical Engineering - quickly, informally and with high quality. Original research reported in proceedings and post-proceedings represents the core of LNME. Volumes published in LNME embrace all aspects, subfields and new challenges of mechanical engineering. Topics in the series include: -Engineering Design -Machinery and Machine Elements -Mechanical Structures and Stress Analysis -Automotive Engineering -Engine Technology -Aerospace Technology and Astronautics -Nanotechnology and Microengineering -Control, Robotics, Mechatronics -MEMS -Theoretical and Applied Mechanics -

César Acevedo-Argüello 2 years ago

Dear sirs, I wonder why this book series has been given a quartile. Moreover, in this book series "proceedings and post-proceedings" are published, as stated in the description. Is this item meant to be considered a journal, even though it was classified as another type of publication?
